

- In the original website, take the headers (research focus, projects, presentations, books) and put them into a dropdown in the research section (anchors?)
- Take the content of the home page and put it into the research page
- Remove the fourth section on the About Me page (you can remove it from the home page)
- 
- Keep mission and contact me (keep the contact page) only on the home page and remove from other pages
- Remove the service and FAQ pages from all pages
- Remove from the Why Reach Out section on the contact page
- Make volunteer work its own section/header, even if it is small
- Remove GPA
- Change statement on home page to “Advancing patient-centered research that makes medical information easier to understand and improves care for underserved communities”
- About my research should be on the homepage, and the View Research button should take you to the research page
